

	Number of lines in the table : 5397								
# Column	Name of the Column	Variable's type	Description	Is the variable available before prediction	Variable's type	Percentage of missing values	Categorical / Quantitative	Distribution	Comments
		Is the variable a feature or the target ? (Only applicable for supervised learning projects)	What does this variable represent (from a business perspective ?)	Is this variable known before the prediction is made ? (Only applicable for supervised learning projects)	int64, float etc... If "object", develop.	in %		For categorical variables with less than 10 categories, list all categories. For quantitative variables, detail the distribution (basic descriptive statistics)	Free text
1	OBJECTID	feature	Unique identifier for each record.	yes	float64	0,00%	Unique Value	N/A	
2	County	feature	The name of the Californian county where the solar power infrastructure is located.	yes	object	0,00%	Categorical - more than 10 categories	N/A	
3	Acres	feature	The solar power plant area in acres (1 ac = 4046.8564224 m2).	yes	float64	0,00%	Quantitative	[mean: 27.83, std: 185.73, min: 0.0004, 25%: 0.93, 50%: 2.09, 75%: 4.77, max: 7438.6]	
4	Install Type	feature	The type of solar installation.	yes	object	0,00%	Categorical - 3 to 5 categories	['Ground': 2164, 'Rooftop': 1841, 'Parking': 1392]	
5	Urban or Rural	feature	A classification of whether the location of the solar power plant is in an urban or rural area.	yes	object	0,00%	Categorical - Binary	['Urban': 3631, 'Rural': 1766]	
6	Combined Class	feature	Combination of "install type" and "Urban or Rural" indicating the solar power plant's type and location.	yes	object	0,00%	Categorical - 6 to 10 categories	['Rooftop - Urban': 1710, 'Ground - Rural': 1570, 'Parking - Urban': 1327, 'Ground - Urban': 594, 'Rooftop - Rural': 131, 'Parking - Rural': 65]	
7	Distance to Substation (Miles) GTET 100 Max Voltage	feature	The distance from the solar power plant to the nearest substation with a GTET 100 Max Voltage, in miles (1 mi = 1,609.344 m).	yes	float64	0,00%	Quantitative	[mean: 4.87, std: 5.59, min: 0.0, 25%: 1.36, 50%: 2.76, 75%: 6.18, max: 55.74]	
8	Percentile (GTET 100 Max Voltage)	feature	The percentile ranking related to the GTET 100 Max Voltage distance	yes	object	0,00%	Categorical - 3 to 5 categories	['0 to 25th': 1350, '25th to 50th': 1349, '50th to 75th': 1349, '75th to 100th': 1349]	
9	Substation Name GTET 100 Max Voltage	feature	The name of the nearest substation with a GTET 100 Max Voltage	yes	object	0,00%	Categorical - more than 10 categories	N/A	Has no NAN but has many "unknown"
10	HIFLD ID (GTET 100 Max Voltage)	feature	A unique identifier for the GTET 100 Max Voltage substation	yes	float64	2,63%	Unique Value	N/A	
11	Distance to Substation (Miles) GTET 200 Max Voltage	feature	The distance from the solar power plant to the nearest substation with a GTET 200 Max Voltage, in miles (1 mi = 1,609.344 m).	yes	float64	0,00%	Quantitative	[mean: 9.00, std: 8.95, min: 0.0, 25%: 3.11, 50%: 6.14, 75%: 11.99, max: 102.22]	
12	Percentile (GTET 200 Max Voltage)	feature	The percentile ranking related to the GTET 200 Max Voltage distance	yes	object	0,00%	Categorical - 3 to 5 categories	['0 to 25th': 1349, '25th to 50th': 1350, '50th to 75th': 1349, '75th to 100th': 1349]	
13	Substation Name GTET 200 Max Voltage	feature	The name of the nearest substation with a GTET 200 Max Voltage	yes	object	0,00%	Categorical - more than 10 categories	N/A	Has no NAN but has many "unknown"
14	HIFLD ID (GTET 200 Max Voltage)	feature	A unique identifier for the GTET 200 Max Voltage substation	yes	float64	4,30%	Unique Value	N/A	

	Number of lines in the table : 5397								
# Column	Name of the Column	Variable's type	Description	Is the variable available before prediction	Variable's type	Percentage of missing values	Categorical / Quantitative	Distribution	Comments
		<i>Is the variable a feature or the target ? (Only applicable for supervised learning projects)</i>	<i>What does this variable represent (from a business perspective ?)</i>	<i>Is this variable known before the prediction is made ? 15	Distance to Substation (Miles) CAISO	feature	Distance to the nearest substation within the California Independent System Operator (CAISO) area, in miles (1 mi = 1,609.344 m).	yes	float64	0,00%	Quantitative	[mean: 6.48, std: 5.25, min: 0.0, 25%: 2.65, 50%: 5.06, 75%: 8.78, max: 60.37]	
16	Percentile (CAISO)	feature	The percentile ranking related to the CAISO substation distance	yes	object	0,00%	Categorical - 3 to 5 categories	['0 to 25th': 1350, '25th to 50th': 1348, '50th to 75th': 1350, '75th to 100th': 1349]	
17	Substation CASIO Name	feature	The name of the nearest CAISO substation	yes	object	0,19%	Categorical - more than 10 categories	N/A	Column name has a typo in the data. should be CAISO and not CASIO
18	HIPLD ID (CAISO)	feature	A unique identifier for the CAISO substation	yes	float64	4,02%	Unique Value	N/A	
19	Solar Technoeconomic Intersection	target	Indicator of the area's suitability for solar technology (modes: 'Within', 'Outside'), referring to areas with high or low solar potential.	yes	object	0,00%	Categorical - Binary	['Within': 3790, 'Outside': 1607]	
20	Shape__Area	feature	The area size of the solar power plants in square meters	yes	float64	0,00%	Quantitative	[mean: 1.12E5, std: 7.51E5, min: 1.67E0, 25%: 3.78E3, 50%: 8.49E3, 75%: 1.93E4, max: 3.01E7]	
21	Shape__Length	feature	The geometric perimeter of the solar power plants geographical shape	yes	float64	0,00%	Quantitative	[mean: 799.67, std: 1549.49, min: 20.31, 25%: 272.55, 50%: 412.06, 75%: 645.83, max: 35928.27]
